

Welcome to smart-TEC, Mirka Tucker!

Ms. Mirka Tucker will be actively supporting the smart-TEC team, or more precisely the order management, from January 2021. In her last employment she was already the interface between sales, logistics and production. The coordination of complex orders and the cooperation with development, production, sales and product management is not new territory for her. Professional communication with internal and external customers rounds off her profile.

„I am looking forward to exciting and dynamic tasks in the RFID and NFC environment. The NFC and RFID technology that makes products smart and the variety of applications in different industries have convinced me. I am happy to join a modern and dynamic company and contribute to its success. The fact that I can use my native language, Czech, is very gratifying for me.“

Mirka Tucker, Order Management smart-TEC
